

Scenario:

You are a person who is struggling to do much on time or have an exact schedule. You find yourself the PlanMe app that helps plan things for you and helps you change your schedule when you need to.

Task 1: Create a schedule with the times you want to work, exercise, and eat

Task 2: Look through the list of others schedules and see which best fits you and edit it to your terms of how it helps you.

Task 3: You chose your favorite schedule and decided to copy and save it and can now use it and edit it to your choice of anything that happens.

Notes:

What changes should you make:

1. Make a more specific help section
2. Add a settings to change calendar to your kind
3. Add a custom alarm system so other can change

What changes to keep:

1. The planning section
2. Save and copy others
3. The time and notification of what happens in next during the day.
